Applicant Initiated Interview Request Form

Application No.: 09/667,862 First Named Applicant: Shigefumi WADA

Examiner E, B, Kiss Art Unit: 2122 Status of Application: Pending RECEIVED

CENTRAL FAX CENTER

MAR 2 4 2004

OFFICIAL

Tentative Participants:
(1) KENNETH BERNER (2) _____

(3) _____ (4) _____

Proposed Date of Interview: 3/25 Proposed Time: AM (AM/PM)

Type of Interview Requested:
(1) [X] Telephonic (2) [X] Personal (3) [ ] Video Conference

Exhibit To Be Shown or Demonstrated: [ ] YES [X] NO
If yes, provide brief description: _____

Issues To Be Discussed

Issues (Rej., Obj., etc)	Claims/ Fig. #s	Prior Art	Discussed	Agreed	Not Agreed
(1) supportin specification	12		[ ]	[ ]	[ ]
(2)			[ ]	[ ]	[ ]
(3)			[ ]	[ ]	[ ]
(4)			[ ]	[ ]	[ ]

[ ] Continuation Sheet Attached

Brief Description of Arguments to be Presented:
More detailed showing of support in specification for claim 12.
See claim 12 as marked up (attached)

An interview was conducted on the above-identified application on _____ .

NOTE:
This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).
This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.

Kenneth M. Berner

INITIALLY GRANTED FOR 5/28/2004, BUT CANCELED BY EXAMINER ON 5/24/2004 CRX

from accounting-journal slips, sales slips, and purchase slips.

Claims 6-11 (canceled).

12. (Currently Amended) A computer-readable recording medium in which plural basic-administrative-tasks software programs that are to be installed and operated in plural terminals of a computer system are recorded wherein the computer system includes (a) plural terminals for processing basic-administrative-tasks, and (b) a database device that stores company resource data required for the tasks and is controlled by a database server computer, said computer-readable recording medium, comprising:

(1) in addition to a the plurality of said basic-administrative tasks software programs, a data-writing processing module for recording that records:

(a) a Dynamic Link Library (DLL) file, which stores a data-writing processing function group that corresponds to each table of said database in order to create a database writing application program that can correspond to either a condition that is customized to each table of the basic-tasks programs or a condition that is not customized to each table of said basic-tasks programs at the time of data entry process where data are entered into the table of a database with the basic-tasks programs that are installed in said terminal computers; and

(b) a program file of a program file means for creating a primary dump file, in which a current table is automatically created when the basic-tasks programs are set up[[;]] and for (2) said means for creating a primary dump file automatically creates creating a default dump file that includes all the information on the database related to the tasks under a given filename in a given path of said server computer when said basic-tasks programs are set up in one of said terminal computers;

(3) said a data-writing processing function group means for classifying classifies said tables into at least two conditions, the first condition in which either customized writing is done or not, and the second condition in which the type of data entry is either new writing, revision, or deletion at the time of writing process of said basic-tasks programs executed per each table, said tables being then stored in the DLL according to each possible combination of said two conditions[[; (4)]] wherein the function groups have respective arguments in which at least a

S25

target database name, data to be entered, a serial number, and an| identification number are
entered, wherein (a) items to be entered, ~~i.e., additional data and style formats,~~ are given to the
arguments of the customized functions, and (b), when a function that corresponds to each table is
called up and required task processing data are set as entry items to the arguments, data are
written by said function onto a target table specified in the arguments[[;]].

~~(5) a default dump file is created by said means for creating a primary dump file as an
original table under a given filename in a given path when (a) programs recorded in said
computer readable recording medium are installed onto said terminal computer, and (b) a basic
tasks program into which data writing processing is to be done is set up;~~

~~(6) columns are added to an original table that includes the default dump file, or new
tables are created when customization is desired;~~

~~(7) the data writing processing function that corresponds to the above mentioned
classification per each table of the basic tasks program is called up from the data writing
processing function group of said DLL file;~~

~~(8) a data writing processing application program that can enter sequential data for each
table unit by batch processing is created, using a series of data writing processing functions, to
the arguments of which required basic tasks processing data are entered respectively; and that~~

~~(9) the data writing processing application program is operated by said terminal
computer, so that (a) data of the original column data of the customized column in case of a
customized table are sequentially written onto each table, and that (b) the basic tasks programs
are processed.~~

13. (Currently Amended) A computer-readable recording medium in which basic-
administrative-tasks software programs are recorded, comprising:

~~(1) said computer readable recording medium is equipped with, in addition to~~ a plurality
of said basic-tasks programs; ~~and~~

a data-writing processing module[[.]].

a data-accepting processing module that stores a data-accepting processing function
group which corresponds to each table in a DLL file, in order to create a database writing
application program that compatibly operates under both customized and uncustomized
conditions for each table of the basic-tasks programs when [[a]] general-purpose data, ~~namely~~
